

Dr. Sukumar J. Magdum Foundation's, Jaysingpur.

# Late Mrs. Housabai Homoeopathic Medical College & Hospital, Nimshirgaon.

## Department of Practice of Medicine

### INTRODUCTION

“ It is more important to know what sort of person has a disease  
than to know what sort of disease a person has.”

- Paracelsus

Medicine & Homeopathic Therapeutics is the branch that deals with the study of diseases and their Homeopathic Management. This department is one of the departments that, imparts the knowledge and skills through teaching and training the medical students for the III<sup>rd</sup> Year & IV<sup>th</sup> Year and during the internship. It also imparts knowledge in the curative, preventive and promotive concept of primary health care and therapeutic utility.

It covers diagnosis, treatment, and prevention of disease, medical research, and many other aspects of health; as a part of Knowledge of Medicine and also includes ***Integration of this clinical approach and homeopathy.***

In modern clinical practice, **physicians** and **physician assistants** personally assess patients in order to **diagnose**, **prognose**, treat, and prevent disease using clinical judgment. The **doctor-patient relationship** typically begins an interaction with an examination of the patient's **medical history** and **medical record**, followed by a medical interview and a **physical examination**.

The homoeopath, recognizing the individual as body, mind, and spirit, takes an extensive history of all physical, mental, and emotional symptoms.

The scope of homoeopathy is a subject which has received too much consideration of knowledge of subject of Medicine to achieve accuracy and efficiency in homoeopathic therapeutics. The idea of the field in which “The principle of Similia” is operative and become more clear by the application of knowledge of Medicine.

Thus Practice of Medicine aims to promote and maintain health and wellbeing through practice of homoeopathy.
