Title :

Gout: Clinical Presentation and its Homoeopathic management with Colchicum Autumnale: Review

Author :

Dr. Mrs. Saroj R. Sawant, Dr. Omkar A. Katage, Dr. Padamavati A. Kumbhar,
Dr. Prajakta K. Patil

Journal Name:

The Classical Science December 2019 Vol. 13 Issue No. 12

Abstract :

Gout is an inborn error of purine metabolism and it leads to deposition of monosodium urate crystals in the form of tophi. It is an inflammatory arthritis characterized by self-limiting but very painful in acute attacks. Gout was first recognized by Egyptians long year ago I 2640 BC and is one of the oldest this as “arthritis of rich” due to its relation with certain foods and excessive alcohol. High levels uric acid can be the result of a diet in red meat and shellfish, alcohol, Sugary drinks and food in fructose, but along with this obesity, hypertension, family history, and side effect of different medications.

Conclusion:

Colchicum is very useful remedy for the treatment of gout. Orthodox school of medicine abused this medicine in the form of colchicine since many years. But homoeopathy treats the man and not diseases. The important take – away here is that there are many natural treatments that can be used for gout they’re easy to use, readily available, cheap by comparison.

Title :

*Retrospective Observational Study of Role of Cimicifuga Racemosa
Mother Tincture in Insomnia*

Author :-

Dr. Pradeep Patil, Dr. Vijayanti Aklekar, Dr. Swati Kulkarni

Journal Name:

The Classical Science December 2019

Abstract:

The present study was undertaken with the objective of understanding the role of cimicifugaracemosa (Actaea Racemosa) mother tincture in patients suffering from Insomnia. There is increased incidence of Insomnia. Stress and modern life style is estimated to be the root cause in most of Insomnia cases. Homoeopathy offers an immense scope to treat the sick individuals to which certain names have been falsely applied. 50 cases of Insomnia were taken and observed the results of treatment by prescribing Cimicifugaeacemosa mother tincture. But when Cimicifugaracemosa has been prescribed only on therapeutic consideration it has limited significance in treatment of cases of Insomnia.

Conclusion:

From this study it is evident that the percentage wise there is no considerable difference in improvement. Cimicifugaracemosa prescribed for this study on basis of Therapeutics utility of symptoms of Insomnia.

Key – words:

Insomnia, Cimicifugaracemosa, Similimum, Mother tincture.

Title :

A Retrospective Observational Study of Role of Medicines in Depression

Journal Name:

The Classical Science May 2019

Author :-

Dr. Pradeep Patil, Dr. Vaijayanti Aklekar, Dr. Swati Kulkarni

Abstract:

Depression affects 15% of the general population at some point in life. Persistent stress and adaptation for modern life style is estimated to be the root cause of depression. Homoeopathy offers an immense scope to treat the sick individuals rather than oncological diagnosis depression has been falsely applied.

Conclusion :

From this study it is evident that the percentage wise there is considerable difference in improvement. Homoeopathic Medicines prescribed for this study on basis of Totality of symptoms for cases of Depression.

Key – words:

Depression, Simillimum, Individualization, Doses.

Title :***FIGHT OF PSORIASIS WITH HOMEOPATHY*****Author Name:**

Dr Saroj R Sawant, Dr Shubhangi S Magdum, Dr Pooja P Ganbavale,

Dr Omkar A Katage.

Journal Name:

International Journal Of Ayush

Review Article Volume 8 Issue 4 Oct-Dec 2019

Abstract:

Psoriasis is an inflammatory skin condition that affects two to three per cent of the population. It can appear at any age, but mostly between the ages of 11 and 60. Psoriasis is an autoimmune disease, belonging to a group of conditions where the immune system is overactive and attacks its own cells and tissues. Normally skin cells are formed at the bottom of the outer layer of our skin. The cells go through a cycle of change, moving upwards through the layers to the surface of the skin where they die and are shed within a period of three to four weeks. In psoriasis this process is speeded up and cells can go through this cycle within three to four days. This causes thickening of the skin and its characteristic scaly appearance. Psoriasis affects mainly the skin and nails, but in six per cent of cases it is accompanied by inflammation of joints, affecting mainly fingers, toes and the spine and is called psoriatic arthritis.

CONCLUSION

The case studies concluded that there is a very positive, effective and long term disease-free situation that can be achieved with —Individualized homeopathic treatment. Not only there is an early and fast general feeling of wellbeing their social position and confidence is also restored. Appreciable and good control of mental and emotional status was seen after the correct homeopathic remedy thereby reducing the relapses period and intensity. The incidence or prevalence of disease can also be reduced by supplementation of healthy diet and change in lifestyle. The avoidance of sedentary lifestyle and conduction of a disciplined daily regimen is found essential for combating many diseases including Psoriasis

Key words:

Case report, skin thickening, Homoeopathy, *Autoimmune disease*, Lycopodium
